PERTRONIX<sup>®</sup> INC.

We are pleased to present our 2010 ignition catalog!

Our customers are our biggest asset and we would like to thank you for your continued support of the PerTronix performance brands!

We have continued to be the world leader in the point replacement business offering significantly more applications than all of our competitors combined. And now with the recent Ignitor®III product release, electronic ignition module technology has moved "up and to the right". Featuring multiple sparks throughout the entire RPM range as well as a high resolution rev limiter set by the user all inside the distributor, you now can have "ignition box" performance without the box! Look for new products throughout our catalog.

In November 2008 PerTronix purchased the assets of JBA Performance Exhaust. We are continuing the JBA 22 year tradition of building the highest quality, best fitting headers and exhaust systems with application emphasis on Late Model Trucks, SUV's and Muscle Cars. JBA is a welcome addition to our ever growing family of exhaust brands including Doug's Headers, Patriot Exhaust Products and Thunderbird Exhaust Products.

The Pertronix sponsored Duttweiler powered Hairston Motorsports and Racing 2007 GTO continues to impress the Pro-Street world by running the quickest ever elapsed time of 6.23 seconds at 231.30 MPH and recently set the national speed record of 230.23 MPH at the famous Famoso Raceway in Bakersfield, California during a West Coast Hot Rod event. Visit [www.pertronix.com](http://www.pertronix.com) and follow the Team's performance.

## CHECK OUT WHAT'S NEW

IGNITOR III Ignition modules featuring multiple spark output and integrated rev limiter.

Flame-Thrower III 45,000 volt coils are the perfect match for Ignitor III systems.

New billet distributors for AMC, Buick, Oldsmobile, Pontiac, Chevy 409 & 4.3L, and GM L6 Engines. Also check out our new line up of Ignitor III equipped billet distributors.

e-core coils charge  
extremely fast and  
produce 60,000 volts for  
HIGH RPM applications.

## IGNITOR® ELECTRONIC IGNITION

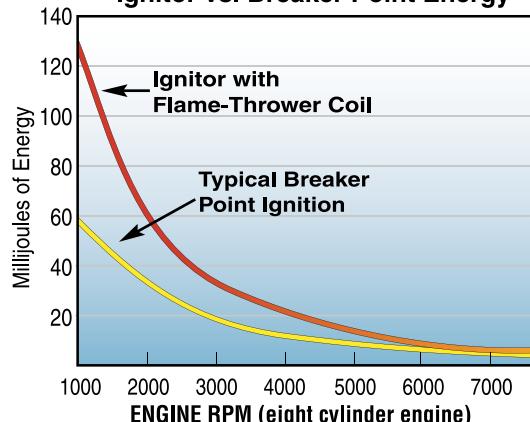

For over thirty years, the Ignitor has proven itself in applications ranging from race cars to tractors. The Ignitor replaces breaker points and troublesome factory electronic ignitions with a dependable, self contained and maintenance free electronic ignition system. The Ignitor has been called the "stealth" ignition because of its quick installation and nearly undetectable presence under your distributor cap. There is no "black-box" to clutter the engine compartment. For optimal performance, use the Ignitor with Flame-Thrower 40,000 volt coils.

### FEATURES

- Delivers twice the voltage to the spark plugs, increasing horsepower, fuel economy, and spark plug life.
- 2:1 improvement over "points" in current fall time for increased coil output.
- Rotating cobalt magnets trigger a Hall Effect integrated circuit ...no points to burn, ...no moving parts to wear out.
- Epoxy molding makes our module impervious to dirt, oil, grease and moisture.
- Stable timing ...no need for any adjustments.
- Will trigger most multi-spark CD ignitions.
- Available for 6 and 12-volt negative and positive ground systems.
- Legal in all 50 states and Canada. (C.A.R.B. E.O. #D-57-22)
- Guaranteed for 30 months... We Stand Behind It!

**Ignitor vs. Breaker Point Energy**

## Ignitor® II ELECTRONIC IGNITION

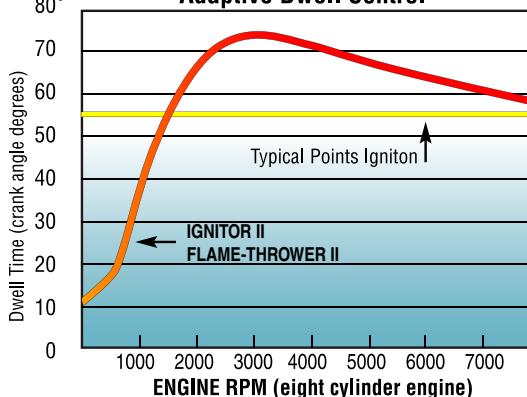

The Ignitor II has many of the same great features that the Ignitor has, but its smarter. Ignitor II units sense the coil current level and use a powerful micro controller to adjust the dwell. Variable dwell helps to maintain peak energy throughout the entire RPM range. Ignitor II systems develop up to 4 times more energy between 3000 and 5000 RPM than standard ignition systems. High RPM performance is improved when used with the Flame-Thrower II super low resistance (0.6 ohms) 45,000 volt coils.

### FEATURES

- Adaptive dwell maintains peak energy throughout the entire RPM range, reducing misfires while improving engine performance.
- Develops on average 4 times more available energy between 3000 and 5000 RPM, and 2 times more available plug voltage.
- Compensates for inherent electronic delay by adjusting the spark timing throughout the entire RPM range.
- Synchronized peak current and spark timing reduces heat build-up.
- Senses startup and develops more energy for quicker, easier starting.
- Built in reverse polarity and over current protection shuts down the system, preventing component damage.
- Legal in all 50 states and Canada. (C.A.R.B. E.O. #D-57-22)
- Guaranteed for 30 months... We Stand Behind It!

**Adaptive Dwell Control**

# Ignitor® III

## ELECTRONIC IGNITION

Our all new Ignitor III ignition modules are designed for the serious performance enthusiast who demands serious power. You have seen the performance increases the Ignitor and Ignitor II series of electronic ignitions have brought. Now get ready for more... 5 times more spark energy than points systems. Ignitor III modules provide ignition box performance... without the "box"! For the maximum Ignitor III benefit, select one of our Flame-Thrower III or HC ignition coils from the coil section of this catalog.

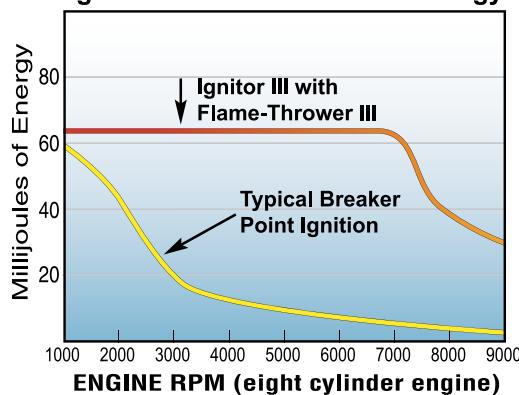

### FEATURES

- Multiple sparks thru the entire RPM range.
- Integrated digital REV limiter with LED feedback for precise RPM setting.
- Memory safe function stores settings eliminating unintended changes to Rev limit.
- Adaptive dwell maintains peak energy throughout the entire RPM range, reducing misfires while improving engine performance.
- Peak current level is reached just prior to spark for maximum energy without the heat build-up, increasing coil performance and module reliability.
- Adjusts spark timing at higher RPMs to compensate for the inherent electronic delay.
- Senses startup and increases energy for quicker, easier starting.
- Thermal clad surface mount construction for superior reliability.
- Built-in reverse polarity and over current protection shuts down the system, preventing component damage.
- Not compatible with CD or Multi-Spark boxes.
- Legal in all 50 states and Canada. (C.A.R.B. E.O. #D-57-22)
- Guaranteed for 30 months... We Stand Behind It!

**Ignitor III vs. Breaker Point Energy**

### FEATURE COMPARISON

	IGNITOR®	Ignitor® II	Ignitor® III
Fits entirely inside the distributor. No "Black Box" to clutter the engine compartment	✓	✓	✓
Stable timing... No need for adjustment	✓	✓	✓
Epoxy molded module makes module impervious to dirt, oil, grease and moisture	✓	✓	
Hall Effect integrated circuit.. No points to burn no moving parts to break	✓	✓	✓
Surface Mount Technology	✓	✓	✓
Legal in all 50 states and Canada (C.A.R.B. E.O. #D-57-22)	✓	✓	✓
Compatible with most point type ignition coils	✓	✓	✓
Adaptive dwell control maintains peak energy throughout the entire RPM		✓	✓
High RPM timing correction		✓	✓
Engine Start-up energy boost		✓	✓
Reverse polarity and over current protection		✓	✓
Compatible with low resistance ignition coils		✓	✓
Thermal Clad construction			✓
Integrated adjustable REV Limiter with LED feedback			✓
Multi-spark ignition			✓

## APPLICATION NOTES

The Ignitor III is a high performance ignition system with special application and operational requirements. It is imperative that applications equipped with resistance wires or ballast resistors be modified according to the installation manual. In all applications in order to achieve the advertised performance gains and system reliability, the integrity of the electrical system should be checked.

- For use on 8 cylinder engines
- 12 volt negative ground systems
- Requires 12-14 Volts
- Must use suppression core ignition wires

- Not for use with CD or multiple spark systems
- Lobe sensor design triggers off the point cam or reluctor and does not require a magnet sleeve
- Not intended for marine use.

### 71181 FOR DELCO DISTRIBUTORS

This kit takes just a few minutes to install and is hidden entirely under the distributor cap. Developed for 1957-74 Delco point type distributors with mechanical advance weights on top.

71181

1957-74 AMC	1957-74 GMC
1957-74 Buick	1966-74 Jeep
1956-74 Cadillac	1956-74 Oldsmobile
1964-74 Checker	1957-74 Pontiac
1957-74 Chevrolet	1960-66 Studebaker

### 71381A FOR CHRYSLER DISTRIBUTORS

71381A fits Chrysler aluminum bodied single point distributors with vacuum advance. This kit features a completely redesigned advance plate assembly utilizing a custom nylon glide hub which provides smooth trouble free operation.

71381A

1962-75 Chrysler	1959-72 Plymouth
1960-72 Dodge	

### 7HO-181 FOR HOLLEY GOLD BOX DISTRIBUTORS

Holley gold box distributors have never before been known for their performance or reliability... until now. We've developed this 7HO-181 Ignitor III system to replace the factory electronics. 7HO-181 fits entirely within the distributor and triggers off the reluctor.

1972-81 IHC Trucks

7HO-181

### 71281D FOR DUAL POINT MOTORCRAFT DISTRIBUTORS

Dual point and dual point vacuum advance Motorcraft distributors which were used in high performance Ford, Mercury and Pantera applications will certainly benefit from our 71281D Ignitor III conversion. This kit simply installs in place of the points and offers performance levels well beyond the reach of points systems.

71281D

1960-72 Ford	1972-74 Pantera
1960-73 Mercury	

### 7ML-181 FOR MALLORY POINT TYPE DISTRIBUTORS

Tired of replacing points in your Mallory single or dual point non-vacuum distributor? Want more power? Our 7ML-181 will install in just minutes and has all the features you would expect from a high performance ignition but fits entirely in the distributor.

7ML-181

## APPLICATION NOTES

Great effort has gone into insuring the accuracy of this guide. The following pages represent the most common makes and models of each application. To insure that you select the correct part number, use these general guidelines:

- Read all footnotes before ordering.
- Unless otherwise noted, part numbers listed represent 12-volt negative ground kits. Many kits are available in 6-volt negative ground, as well as 6 and 12-volt positive ground. Add an N6, P6 or P12 suffix to the part number when ordering.
- Applications are based on the vehicle's original equipment.
- An "LS" suffix indicates a Lobe Sensor version. Lobe Sensor technology senses the point cam, and does not use a magnet sleeve or magnet ring.
- Compatible coils can be found in the coil section of this catalog.
- If your application is not listed please contact us for information on possible custom kits.
- New applications appear in red.

<b>FOOTNOTES</b>	
1	Excluding California models
2	Factory electronic ignition
3	Excluding Bosch distributor number 0231115045
5	Canadian models only
8	Single point distributor
10	Dual point distributor
13	Lobe sensor module
14	European models only
15	Excluding lean burn computer controlled engines
16	Mechanical advance under breaker plate
18	Excluding 215 and 300 cid. engine
19	Mechanical advance at top of shaft
34	Non vacuum advance distributor
35	Special keeper no. MR-122K required for distributors without distributor cap
36	Excluding distributor number 112314
43	Odd fire engine
55	Also available in 6-volt negative ground, add N6 to part number
56	Also available in 6-volt positive ground, add P6 to part number
57	Also available in 12-volt positive ground, add P12 to part number
59	Single distributor applications
60	Dual distributor applications
61	Kit contains one module for each distributor
62	With six lobe point cam
63	With four lobe point cam
64	With three lobe point cam
70	Early DM2 distributor
71	Late DM2 distributor
72	Fits single point and dual point distributors
79	Ignitor II applications can not be used with solid core ignition wires
85	Point cam felt bracket removal required
88	Ignitor III kit available see page 4 for details

New applications appear in red

## AFTERMARKET DISTRIBUTORS

Not getting the performance you expected out of your "brand name" points distributor? Tired of replacing expensive burnt-out optical modules? Then you have come to the right place. Chances are PerTronix makes Ignitor or Ignitor II kit to convert your distributor which will improve reliability and increase your ignition performance.

**APPLICATIONS BY DISTRIBUTOR PART NUMBER**

We have Ignitor and Ignitor II kits which are made to fit specific distributor types and part numbers. Many of these kits are not tied to a particular vehicle application. If you can't find what you need in the application section of our catalog, use this look up. If its not here, that doesn't mean that we don't have it. If you are interested in a kit for a specific distributor please call (909) 599-5955.

## APPLICATION NOTES

Great effort has gone into insuring the accuracy of this guide. The following pages represent the most common makes and models of each application. To insure that you select the correct part number, use these general guidelines:

- Read all footnotes before ordering.
- Unless otherwise noted, part numbers listed represent 12-volt negative ground kits. Many kits are available in 6-volt negative ground, as well as 6 and 12-volt positive ground. Add an N6, P6 or P12 suffix to the part number when ordering.
- Applications are based on the vehicle's original equipment.
- An "LS" suffix indicates a Lobe Sensor version. Lobe Sensor technology senses the point cam, and does not use a magnet sleeve or magnet ring.
- Compatible coils can be found in the coil section of this catalog.
- If your application is not listed please contact us for information on possible custom kits.
- New applications appear in red.

## APPLICATION NOTES

Great effort has gone into insuring the accuracy of this guide. The following pages represent the most common makes and models of each application. To insure that you select the correct part number, use these general guidelines:

- Read all footnotes before ordering.
- Unless otherwise noted, part numbers listed represent 12-volt negative ground kits. Many kits are available in 6-volt negative ground, as well as 6 and 12-volt positive ground. Add an N6, P6 or P12 suffix to the part number when ordering.
- Applications are based on the vehicle's original equipment.
- An "LS" suffix indicates a Lobe Sensor version. Lobe Sensor technology senses the point cam, and does not use a magnet sleeve or magnet ring.
- Compatible coils can be found in the coil section of this catalog.
- If your application is not listed please contact us for information on possible custom kits.
- New applications appear in red.

## FOOTNOTES

- 2 Factory electronic ignition
- 19 Mechanical advance at top of shaft
- 21 See page 62 for complete replacement distributors
- 22 Clockwise rotation
- 24 Counter clockwise rotation
- 26 Excluding distributor number YL670AV
- 27 Screw down cap
- 28 Clip down cap
- 34 Non vacuum advance distributor
- 55 Also available in 6-volt negative ground, add N6 to part number
- 56 Also available in 6-volt positive ground, add P6 to part number
- 57 Also available in 12-volt positive ground, add P12 to part number
- 58 OMC; Stringer, Cobra and King Cobra applications with Electronic Shift Assist may require slight wiring modification.
- 79 Ignitor II applications can not be used with solid core ignition wires

**NOTES**
**COMPLETE  
INDUSTRIAL  
DISTRIBUTORS**

PerTronix has a complete line of industrial distributors for many of the most popular industrial engines. From Alison to Wisconsin we have got you covered. See page 62

## APPLICATION NOTES

Great effort has gone into insuring the accuracy of this guide. The following pages represent the most common makes and models of each application. To insure that you select the correct part number, use these general guidelines:

- Read all footnotes before ordering.
- Unless otherwise noted, part numbers listed represent 12-volt negative ground kits. Many kits are available in 6-volt negative ground, as well as 6 and 12-volt positive ground. Add an N6, P6 or P12 suffix to the part number when ordering.
- Applications are based on the vehicle's original equipment.
- An "LS" suffix indicates a Lobe Sensor version. Lobe Sensor technology senses the point cam, and does not use a magnet sleeve or magnet ring.
- Compatible coils can be found in the coil section of this catalog.
- If your application is not listed please contact us for information on possible custom kits.
- New applications appear in red.

<b>NOTES</b>							

#### FOOTNOTES

- 21 See page 62 for complete replacement distributors
- 29 Excluding distributor number IAD-4036
- 55 Also available in 6-volt negative ground, add N6 to part number
- 56 Also available in 6-volt positive ground, add P6 to part number
- 57 Also available in 12-volt positive ground, add P12 to part number
- 79 Ignitor II applications can not be used with solid core ignition wires

### PLUG 'N PLAY BILLET DISTRIBUTORS

Plug n' Play billet distributors are designed for maximum ignition performance at a price you can afford. Our distributors are available with Ignitor II technology, or the all NEW Ignitor III multi-spark rev limiting modules. Replace your outdated points, electronic distributor or bulky HEIs with this performance proven system. Simply install the distributor in the engine, connect two wires and start it up!

For even more performance, consider adding one of our compatible Flame-Thrower coils for increased spark energy and higher RPM potential. The lineup includes the Flame-Thrower II and Flame-Thrower III canister style coils as well as our New HC and HV E-core style coils. Specific application information can be found in the coil section of this catalog.

#### FEATURES

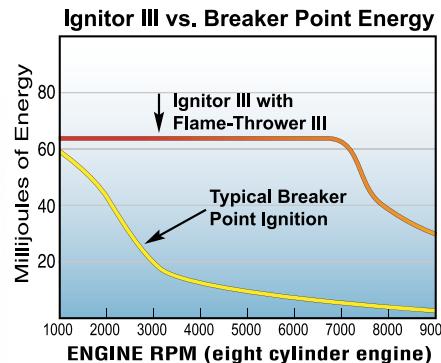

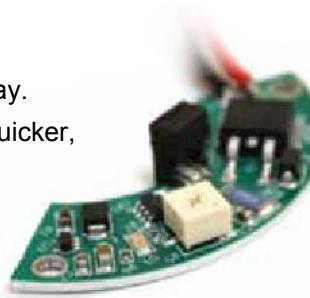

- Precision CNC machined 6061-T6 billet aluminum housings are lightweight yet offer maximum strength.
- Each billet distributor is hand polished and buffed to a high luster.
- Tempered distributor shaft has low torsion displacement for accurate timing and extended operational life.
- Upper ball bearing and extra long oil impregnated bronze lower bushing work together to reduce friction and provide shaft and advance mechanism stability reducing high RPM vibration.
- Precision stamped and balanced mechanical advance weights eliminate erratic timing.
- Adjustable mechanical advance with proprietary limiting function permits multiple settings. Distributors are factory set with a performance advance curve and are provided with additional springs for custom advance curves.
- High dielectric strength cap with male or female brass terminals and premium rotor with brass contact.
- Warranty: 30 Months electronics / Limited 1 year mechanical.
- Legal in all 50 states and Canada.  
(C.A.R.B. E.O. #D-57-23)\*

\* Non vacuum advance distributors do not have an E.O. number and are not legal for sale or use on pollution controlled motor vehicles.

**EQUIPPED  
BILLET DISTRIBUTORS**
**FEATURES**

- Multiple sparks thru the entire RPM range.
- Integrated digital REV limiter with LED feedback for precise RPM setting.
- Memory safe function stores settings eliminating unintended changes to Rev limit.
- Adaptive dwell maintains peak energy throughout the entire RPM range, reducing misfires while improving engine performance.
- Peak current level is reached just prior to spark for maximum energy without heat build-up, increasing coil performance and module reliability.
- Adjusts spark timing at higher RPMs to compensate for the inherent electronic delay.
- Senses startup and increases energy for quicker, easier starting.
- Thermal clad surface mount construction for superior reliability.
- Built-in reverse polarity and over current protection shuts down the system, preventing component damage.
- Not compatible with CD or Multi-Spark boxes.

# Ignitor® II EQUIPPED BILLET DISTRIBUTORS

## FEATURES

- Integrated patented Ignitor II technology with a powerful micro controller and adaptive dwell algorithms constantly adjust the dwell angle to maintain peak energy throughout the entire RPM range for increased high and low RPM performance.
- Cobalt magnets and Hall Effect trigger for stable timing and precise spark distribution.
- Compensates for inherent electronic delay by adjusting the spark timing throughout the entire RPM range.
- Synchronized peak current and spark timing reduces heat build-up.
- Compatible with most Capacitive Discharge Systems.
- Warranty: 30 months electronics / Limited 1 year mechanical.

## MAGNETIC TRIGGER BILLET DISTRIBUTORS

Magnetic triggered billet distributors are built using the same great platform we use for our plug n' play distributor series. These feature rich distributors are the perfect alternative to the more expensive distributors competitors offer.

### FEATURES

- Precision magnetic pickup coil and reluctor offer extremely accurate signaling at low and high RPM.
- Specially engineered reluctor made from lightweight FC-0208 alloy offers superior dimensional stability for symmetrical spark separation.
- Overmolded magnetic pickup coil supports windings while providing excellent resistance to corrosion.
- Easy wiring with standard Tyco Mate-N-Lok™ connector works with most ignition system harnesses.
- Compatible with most capacitive discharge ignition boxes.
- Limited One Year Warranty.

### BILLET DISTRIBUTOR DIMENSIONS

Flame-Thrower billet distributors are frequently used in tight engine compartments due to their simple design and relatively small size. The chart below details approximate distributor dimensions for each engine family. The height dimension "A" is taken from the installed surface to the highest point on the distributor cap. Although our distributors fit their intended engine application, each vehicle application must be evaluated independently to insure adequate space for distributor fitment as well as air cleaner and hood clearance.

Description	Dim A	Female Cap	Male Cap	Gear I.D.
		Dim B	Dim B

### FOOTNOTES

- 75 Non vacuum advance distributors do not have an E.O. number and are not legal for sale or use on pollution controlled motor vehicles  
 76 Can not be used with solid core ignition wires  
 77 Distributor has male terminal distributor cap which requires different ignition wire terminals and boots  
 78 Will not clear factory Grand Sport Ram Air air cleaner  
 81 Must be used with ignition box

- 87 Slip collar distributor allows adjustment of installed height for non standard deck engines  
 89 Bronze distributor gears available see page 38

# Ignitor® II EQUIPPED MARINE BILLET DISTRIBUTORS

Our Flame-Thrower marine billet distributors share many of the performance features that you find in our automotive versions. Marine approved distributors are designed to meet or exceed SAE J1171 standards.

## FEATURES

- Integrated patented Ignitor II technology with adaptive dwell control.
- Non-vented distributor cap with stainless steel fasteners keeps the distributor cap firmly in place.
- Triple screen spark arrestor offers added protection.
- Warranty: 30 months electronics / limited 1 year mechanical.

SAE J1171 Certified

Description	D200800	D200801	D200810	D200811
<b>CHEVROLET SMALL BLOCK - BIG BLOCK ENGINES</b>

### HIGH PERFORMANCE DISTRIBUTORS

Flame-Thrower HP distributors take the performance line of distributors one step higher. That's right, HP stands for High Performance, and that's what you get with our all new HP distributors. These distributors feature patented Ignitor II technology and are available with top exit or our new side exit caps. For optimal performance, use our Flame-Thrower II 45,000 volt coils.

#### FEATURES

- All new lightweight cast aluminum housings.
- Tailored advance curve for optimal performance and drivability.
- Integrated Ignitor II electronic ignition with variable dwell maintains peak energy throughout the entire RPM range, reducing misfires while improving engine performance.
- Develops on average 4 times more available energy between 3000 and 5000 RPM, and 2 times more available plug voltage.
- Peak current level is reached just prior to spark for maximum energy without the heat build-up, increasing coil and module life.
- Adjusts spark timing at higher RPMs to compensate for the inherent electronic delay.
- Senses startup and develops more energy for quicker, easier starting.
- Built in reverse polarity and over current protection shuts down the system, preventing component damage.
- High dielectric strength cap with brass terminals.
- Top or side exit caps available.
- Balanced rotor with overmolded brass contact.
- Warranty: 30 months electronics / limited 1 year mechanical.
- Not legal for sale or use on pollution controlled motor vehicles.

## PERFORMANCE DISTRIBUTORS FOR BRITISH ENGINES

Replace your worn out Lucas 23D, 25D or 45D distributor with a distributor that will deliver the performance you demand. Our Flame-Thrower performance distributors use all new castings modeled after the original Lucas 45D distributor. Each distributor is then precision machined for an exact fit. Four cylinder applications are available with top or our new side exit caps.

### FEATURES

- All new lightweight cast aluminum housings.
- Tailored advance curve for optimal performance and drivability.
- Integrated Ignitor electronic ignition delivers twice the voltage to the spark plugs, increasing horsepower, fuel economy, and spark plug life.
- Rotating cobalt magnets trigger a Hall Effect integrated circuit which enables precise timing.
- High dielectric strength cap with brass terminals.
- Balanced rotor with overmolded brass contact.
- Top or side exit caps available.
- Available for 12-volt negative and positive ground systems.
- Warranty: 30 months electronics / limited 1 year mechanical.
- Not legal for sale or use on pollution controlled motor vehicles.

## PERFORMANCE DISTRIBUTORS FOR VW TYPE I ENGINES

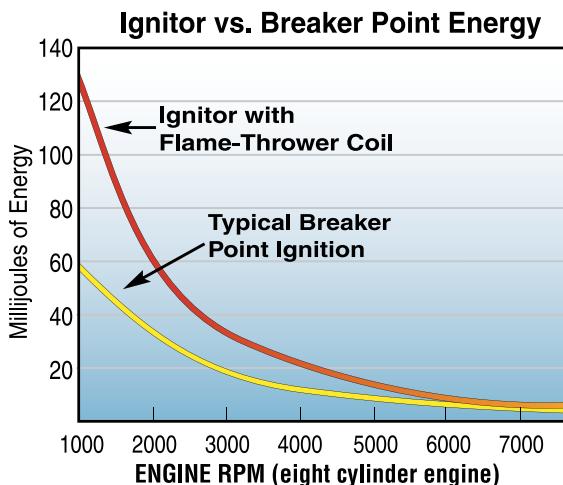

Now you can get a quality distributor that delivers excellent performance and doesn't break the bank. We've taken all the features that you like about the Bosch 009 distributor, and the performance capabilities of the 010 and 050 distributor and designed them into our Flame-Thrower mechanical advance distributor. The vacuum advance version also has a custom tailored advance curve to suit most applications. To top things off these distributors feature integrated Ignitor electronics for both 12 and 6 Volt negative ground systems.

New applications appear in red

### FEATURES

- All new lightweight cast aluminum housings.
- Tailored advance curve for optimal performance and driveability.
- Integrated Ignitor electronic ignition delivers twice the voltage to the spark plugs, increasing horsepower, fuel economy, and spark plug life.
- Rotating cobalt magnets trigger a Hall Effect integrated circuit which enables precise timing.
- High dielectric strength cap with brass terminals.
- Balanced rotor with low resistance brass contact.
- Available for 12-volt and 6-Volt negative ground systems.
- Warranty: 30 months electronics / limited 1 year mechanical.
- Not legal for sale or use on pollution controlled motor vehicles.

## PERFORMANCE DISTRIBUTOR FOR ROVER V8 ENGINES

Replace your worn out Lucas 35D distributor with a distributor that will deliver the performance you demand. Our Flame-Thrower performance distributors are the perfect solution for rover V8 engine swaps. Integrated Ignitor technology increases energy levels and provides maintenance free operation. Installation is simple with only two wires to attach. These distributors are made from all new castings modeled after the original Lucas 35D distributor. Each distributor is then precision machined for an exact fit.

**NEW**

### FEATURES

- All new lightweight cast aluminum housings.
- Integrated Ignitor electronic ignition delivers twice the voltage to the spark plugs, increasing horsepower, fuel economy, and spark plug life.
- Rotating cobalt magnets trigger a Hall Effect integrated circuit which enables precise timing.
- High dielectric strength cap.
- Balanced rotor with overmolded brass contact.
- Warranty: 30 months electronics / limited 1 year mechanical.
- Not legal for sale or use on pollution controlled motor vehicles.

## OE REPLACEMENT DISTRIBUTOR FOR ROVER V8 ENGINES

This OE replacement distributor offers an economical alternative to the expensive factory Lucas 35DLM distributor. Fits 92-95 3.5L, 3.9L and 4.2L engines with two pin ignition modules.

### STREET / STRIP HEI DISTRIBUTORS

Our HEI distributors are built from the ground up with all new components. We have engineered a special high energy module and coil combination that operates without misfires beyond 7500 RPM. That's nearly 3000 RPM higher than most stock HEI distributors.

Flame-Thrower HEI distributor produce 67% more energy with a 45% faster spark breakdown time when compared to the stock HEI. This means twice the energy to the spark plugs. Our tests show that with these improvements wider plug gaps can be used resulting in an increasing flame kernel growth for more efficient combustion.

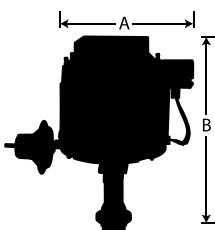

#### FEATURES

- New lightweight aluminum alloy housing.
- Aligned and honed high quality bronze sintered bushings for reduced friction and extended life.
- Centerless ground corrosion resistant shaft reduces friction and provides concentric operation.
- Distributor gear is ground to exact tolerances for tighter mesh with camshaft. (Bronze distributor gear available)
- High dielectric strength cap with brass terminals and low resistance center coil brush.
- Balanced rotor with nylon screws prevent arcing and reduce vibration at high RPMs.
- Adjustable vacuum advance canister and high performance advance curve.
- Precision machined chromoly advance weights and center plate eliminate erratic timing.
- Meets stringent automobile susceptibility, vibration and shock requirements.
- Legal in all 50 states and Canada (C.A.R.B. E.O. #D-57-23)
- Limited One Year Warranty.

**RACE ONLY HEI DISTRIBUTORS**

Race HEI units use all new components and feature an electronic module and coil combination that optimizes spark energy and peak current to the spark plug in the 6000 to 8500 RPM range.

Compared to our street/strip version, race units produce 42% more energy with 46% faster spark breakdown time allowing 48% more peak current to reach the spark plug. This abundant energy doubles the spark intensity during the critical one millisecond of burn time.

Great for both circle track and drag race applications where factory type HEI distributors are mandated.

**FEATURES**

- New lightweight A384 cast aluminum alloy housing.
- Aligned and honed high quality bronze sintered bushings for reduced friction and extended life.
- Centerless ground corrosion resistant shaft reduces friction and provides concentric operation.
- RACE ONLY 7.2 amp module and 50,000 volt coil.
- Distributor gear is ground to exact tolerances for tighter mesh with cam. (Bronze distributor gear available)
- High dielectric strength cap with solid brass terminals and low resistance center coil brush.
- Balanced rotor with nylon screws prevent arcing and reduce vibration at high RPMs.
- Specially designed vacuum lockout prevents changes to rotor phasing to maximize combustion burn time at high RPMs.
- Tig welded rotor and advance plates prevent high RPM distortion while improving reliability.
- Precision machined chromoly advance weights and center plate eliminate erratic timing.
- Additional advance springs included for fine tuning the advance curve to your needs.
- Limited One Year Warranty.
- Not legal for sale or use on pollution controlled motor vehicles.

### PERFORMANCE TUNE-UP KITS

Everything you need to "wake up" your stock Chevy, Olds, Pontiac, Cadillac or Buick distributor. Kits include street-strip 4-pin module and coil combination, premium rotor and cap, custom Flame-Thrower coil cover, adjustable vacuum advance canister, hi-performance advance kit, wire harness and capacitor, and complete installation hardware. "Race Only" tune-up kits bring HEI equipped circle track or drag race engines back to life. These kits include matching coil and module, wiring harness, vacuum lock out, advance weights, springs, bushings, cap, rotor, dust shield, and necessary hardware.

Description	Black	Red	Blue
Chevrolet and Cadillac V8 (red/yellow wire coil)	D8000	D8001	D8002
Buick, Oldsmobile, Pontiac and Corvette (red/white wire coil)	D8010	D8011	D8012
Race Only Tune-Up Kit	D8070*	D8071*	

### CAPS, ROTORS AND DUST COVERS

Made from hi-performance 60 KV rated alkyd molding compound for superior protection from "arc-thru" and cross-fire. Our cap and rotor kits include nylon rotor hold-down screws. Flame-Thrower dust covers provide a larger air gap around the coil which provides cooler operating temperatures.

### WIRING HARNESS AND CAPACITOR

Premium quality wire harness and capacitor insure good connection and "static free" operation.

### MECHANICAL ADVANCE CURVE KIT

Precision machined chromoly weights and center plate eliminate erratic timing. Three sets of springs, guide bushings and complete installation instructions make recurring your distributor easy.

### VACUUM ADVANCE & LOCKOUT

These vacuum canisters help optimize ignition advance for maximum part throttle performance and cruise speed efficiency. Our vacuum lockout plates allow for precise pickup coil position and accurate rotor phasing.

### BRONZE DISTRIBUTOR GEAR

Made from superior quality bronze aluminum and precision CNC machined to provide smooth consistent operation while reducing wear to your camshaft.

\* Not legal for sale or use on pollution controlled motor vehicles

**NEW**

**PERFORMANCE IGNITION MODULES**

Our performance ignition modules are direct replacements for popular GM and Ford electronic distributors. These modules provide enhanced high RPM performance and when used with their corresponding Flame-Thrower coil, increase spark plug voltage by more than 40%.

**FEATURES**

- Thick film technology on alumina ceramic substrates removes heat for greater accuracy and improved reliability.
- Laser trimming gives precise peak current control for increased energy output.
- Each module is tested twice with automated equipment to insure trouble free operation.
- Legal in all 50 states and Canada.( C.A.R.B. E.O. #D-57-22)\*
- Limited One Year Warranty.

\* Race Only modules are not legal for sale or use on pollution controlled motor vehicles

**RACE ONLY 4-PIN HEI MODULE**

D2070\*

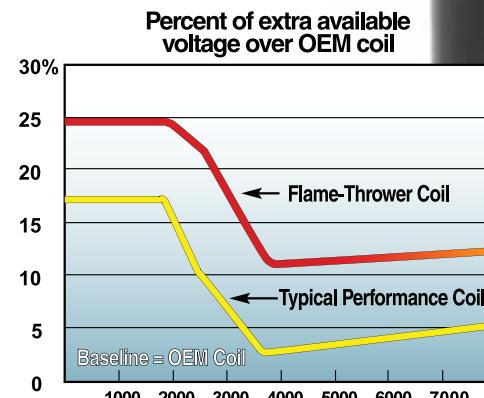

"Race Only" 4-pin HEI modules are built with heavy duty components and engineered to create 42% more energy than street strip versions when combined with "Race Only" coils.

**Flame-Thrower® 40,000 VOLT CANISTER COILS**

While it's the perfect coil to go with the PerTronix Ignitor breakerless ignition, our 40,000 volt Flame-Thrower canister coil can benefit virtually any distributor type inductive system. Its higher voltage allows larger spark plug gaps for added power, smoother response and better fuel economy. These coils are internally resisted so installation and wiring is drastically simplified. Our oil filled coils offer great heat control for street driven vehicles, while our epoxy filled coils provide superior winding support for high vibration environments in off-road vehicles and boats.

**FEATURES**

- 40,000 volts.
- Available chrome plated or black for that "stock look".
- For use with inductive ignition systems.
- 1.5 or 3.0 Ohm primary resistance values available.
- Legal in all 50 states and Canada. (C.A.R.B. E.O. #D-57-21)
- Limited 90 Day Warranty.

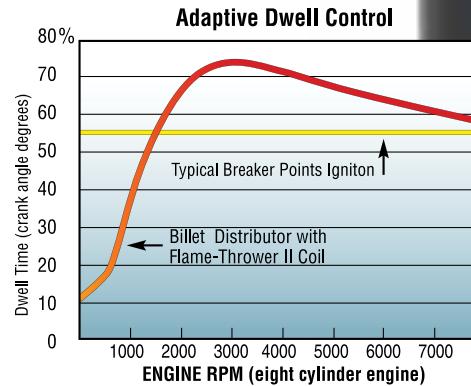

Eight cylinder engine with PerTronix Ignitor installed.

**Flame-Thrower® II 45,000 VOLT CANISTER COILS**

Flame-Thrower II coils feature a very low resistance which make them the ideal coil for Ignitor II ignition systems as well as many other high performance ignitions. Low resistance and improved turns ratio help to produce up to 45,000 volts. This higher voltage enables you to run larger spark plug gaps for added power and better fuel economy. These coils are also compatible with most capacitive discharge boxes including our own Second Strike.

**FEATURES**

- 45,000 volts.
- Available chrome plated or black for that "stock look".
- For use with inductive or CD ignition systems.
- Low 0.6 Ohm primary resistance.
- Legal in all 50 states and Canada. (C.A.R.B. E.O. #D-57-21)
- Limited 90 Day Warranty.

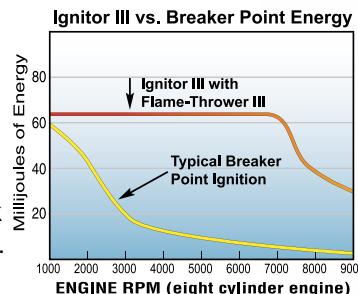

## Flame-Thrower® III 45,000 VOLT CANISTER COILS

Flame-Thrower III coils feature a ultra low resistance and are designed specifically for the new Ignitor III ignition system. Flame Thrower III coils have a high turns ratio and ultra low primary resistance enabling the ignition system to charge faster at high RPM's.

### FEATURES

- 45,000 volts.
- Ultra Low 0.32 primary resistance.
- Compatible with Ignitor II and III systems as well as most capacitive discharge systems.
- Charges to peak current typically 30-70% faster than other coils.
- Rapid charge time means maximum spark energy is sustained to higher engine RPM.
- Legal in all 50 states and Canada.  
(C.A.R.B. E.O. #D-57-21)
- Limited 90 Day Warranty.

**Flame-Thrower® HC****60,000 VOLT COIL****NEW**

New HC (HIGH CURRENT) E-core coils were engineered specifically for our Ignitor III ignition modules. HC coils have a high turns ratio and ultra low primary resistance enabling the ignition system to charge faster at high RPM's. The coil is supported in a special heat sink made from aircraft 6063 T5 aluminum which efficiently transfers heat away from the windings.

**Flame-Thrower® HV****60,000 VOLT COIL**

Our HV (HIGH VOLTAGE) E-core design yields an incredible 60,000 volts and operates with no degradation throughout temperature ranges that surpass military specifications. The special heat sink design made from aircraft 6063 T5 aluminum efficiently transfers heat optimizing energy output for street/strip and off road applications. Flame-Thrower HV .45 ohm coils are also compatible with most capacitive discharge boxes including our own Second Strike.

**FEATURES**

- 60,000 volts.
- Highly efficient E-core design.
- Vacuum potted coil body for longer life and increased reliability.
- 6063 T5 aluminum heat sink with black anodized corrosion resistant finish.
- Precision machined male high tension terminal and brass primary terminals.
- Legal in all 50 states and Canada.  
(C.A.R.B. E.O. #D-57-21)
- Limited 90 Day Warranty.

## 50,000 VOLT E-CORE COILS

Flame-Thrower E-Core coils feature optimized winding design to maximize spark gap current and available voltage. When teamed with Flame-Thrower ignition modules they produce 100% more energy across the spark plug gap (during a one millisecond burn time) compared to the OEM coil. Select one of our matching Flame-Thrower ignition modules on page 47 for a performance proven combo.

### FEATURES

- 50,000 volts.
- Ultra low primary resistance values.
- Legal in all 50 states and Canada. (C.A.R.B. E.O. #D-57-21)\*
- Limited 90 Day Warranty.

\* "RACE ONLY" coils are not legal for sale or use on pollution controlled motor vehicles

### GM HEI COILS

Replaces internal GM coils with black, yellow and red wires. Includes all necessary hardware.

Replaces internal GM coils with black, white and red wires. Includes all necessary hardware.

"Race Only" coils when paired with race modules produce 42% more energy than our street/strip version with 46% faster spark breakdown time allowing 48% more peak current to reach the spark plug between 6000 and 8500 RPM. Includes all necessary hardware.

\* Not legal for sale or use on pollution controlled motor vehicles

### FORD TFI E-CORE COIL

Flame-Thrower 50,000 volt TFI style coils breath new life into your 1982-96 Ford Lincoln and Mercury ignition system. For maximum performance use our Flame-Thrower ignition modules found on page 47.

Replaces remote GM coils found on 1985-95 Buick, Cadillac, Chevrolet, Oldsmobile and Pontiac vehicles.

## THE ULTIMATE IGNITION SUPPLEMENT

Second Strike is the only ignition system to provide a powerful second spark throughout the entire RPM range. Other multiple spark discharge systems typically revert to one spark at about 3000 RPM. The "Second Strike" is a microcontroller based ignition supplement that works with most inductive type systems (points, GM HEI, Chrysler electronic ignition, Ford TFI and Duraspark, Ignitor and Ignitor II). Following the primary spark, the Second Strike delivers a powerful capacitive discharge second spark resulting in more complete combustion. At very high RPM's the increased burn time can reduce misfires resulting in more peak horsepower and torque.

Second Strike's unique crank angle offset (CAO) feature gives you tunability that no other box has. Simply turn the dial and change the time, in crank angle degrees, that the second spark occurs. A wide range of adjustment gives you the flexibility to find which CAO works best for your engine.

The integrated digital rev limiter features easy to use rotary switches that adjust the RPM limit to an ultra fine resolution of 100 RPMs, eliminating the need for old resistor style pills or chips. Proprietary algorithms provide superior control of rev limit and a rapid response time to over rev events, preventing engine failure.

Easy installation with a simple five wire hookup and detailed instructions. No special distributor or ignition coil are required.

### FEATURES

- Only system to provide a second spark throughout the RPM range.
- Powerful CD second spark resulting in more complete combustion.
- Increased burn time increases horsepower and torque at high RPMs.
- Unique (CAO) feature adjusts the timing of the second spark.
- Built-in digital rev limiter with high resolution.
- Digital rotary switches permit easy adjustment.
- Adaptive voltage feature prevents overdriving the ignition coil.
- Voltage protection prevents damage from reversed polarity.
- Tachometer output with TTL interface and near 50% duty cycle make our limiters compatible with most modern tachometers.
- Legal in all 50 states and Canada. (C.A.R.B. E.O. #D-57-22)
- Limited One Year Warranty.

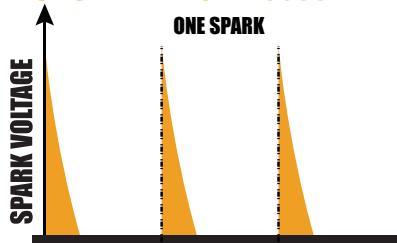

Description	Part No.
Second Strike	500

#### Application Notes:

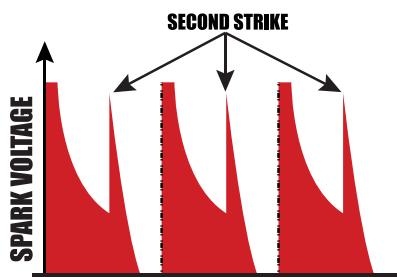

- For 4, 6 and 8 cylinder even fire engines with single coil inductive ignition system
- 12 Volt negative ground
- Not for use on computer controlled vehicles

**TYPICAL MULTI-SPARK CD SYSTEM ABOVE 3000 RPM**

**SECOND STRIKE ABOVE 3000 RPM**

### SPECIFICATIONS

Spark Energy:	245MJ
Primary Voltage:	200-700 Volts
Spark Timing:	Adjustable 2° -18°
Voltage Required:	11-18 VDC
Current Draw:	3.5 Amps @5000 RPM
Size:	6" L X 4" W X 3" H
Weight:	2.3 Lbs.

## FOOL PROOF CONTROL...

Flame-Thrower digital rev limiters work with any 4, 6 or 8 cylinder engine using points, OEM electronic (GM HEI, Ford, Chrysler) or aftermarket inductive type ignition systems including our very popular Ignitor and Ignitor II points replacement systems.

This digital microcontroller based unit provides a much greater accuracy (+/-0.01%) over analog systems. There is no need for old resistor style pills or chips, our easy to use rotary switches adjust the RPM limit to an ultra fine resolution of 100 RPMs. Our proprietary algorithms provides superior control of rev limits and a rapid response time to over rev limit events, preventing engine failure. Rev limiters come with multiple analog filters and one digital filter to prevent coil noise interference from affecting the established rev limit.

Installation is a snap with a four wire hookup and easy to understand instructions. The rev limiter's small size permits installation in even the most crowded engine compartment.

## FEATURES

- Digital microcontroller based unit provides greater accuracy (+/-0.01%) over analog systems.
- Easy to use rotary switches permit settings with a resolution of 100 RPMs.
- Tachometer output with TTL interface and near 50% duty cycle make our limiters compatible with most modern tachometers.
- Reverse voltage protection.
- Conformal coated surface mount PCB for reliability .
- Easy four wire hookup.
- Compact size: 3”L X 2.5”W X 1.4”H.
- Lightweight: 0.75 LBS.
- Legal in all 50 states and Canada. (C.A.R.B. E.O. #D-57-22)
- Limited One Year Warranty.

Description	Part No.
Digital Rev Limiter	600

### Application Notes:

- For 4, 6 and 8 cylinder even fire engines with single coil inductive ignition system
- 12 Volt negative ground
- Not for use with (CD) Capacitive Discharge systems

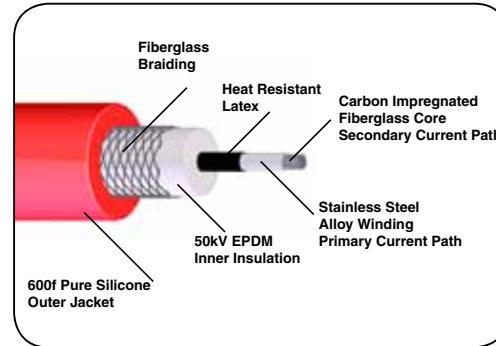

### 8MM CUSTOM FIT MAGX2 SPARK PLUG WIRES

8mm Custom fit MAGx2 wires are available for many popular applications equipped with Flame-Thrower or original GM HEI distributors. Our custom wire sets have factory terminated ends for a superior connection and perfect fit, without cutting, crimping and splicing.

#### FEATURES

- Two current paths for reliability and redundancy.
  - Primary path: Spiral wound stainless steel alloy.
  - Secondary path: Carbon impregnated fiberglass center core.
- Low 500 ohm per foot resistance.
- 8mm Silicone jacket to resist high temperatures, moisture, oil and chemicals.
- EPDM (Ethylene Propylene Diene Methylenne) inner insulation for superior heat resistance and prevention of arcing and voltage leaks.
- Fiberglass reinforcing braid for added strength and flexibility.
- Lifetime Warranty.

## 8MM MAGX2 SPARK PLUG WIRES FOR SPECIALITY APPLICATIONS

Aftermarket distributors often require different spark plug wires. If you don't have the tools or time to make your own wire set, we have the solution. Our custom tailored sets match most applications that use our line of Flame-Thrower performance distributors

## 8MM MAGX2 UNIVERSAL SPARK PLUG WIRES

Universal 8mm spark plug wire kits allow you to build spark plug wires to match your unique engine and wire loom configuration. Universal kits are available with 90°, 45° or straight spark plug boot ends. Each kit includes terminals to fit both male and female terminal distributor caps.

Description	Plug Boot	Dist Boot	Black Part No.	Blue Part No.	Red Part No.
4 cylinder engines	Straight	90°	804280	804380	804480
4 cylinder engines with VW style spark plug boots	Straight	90°	8042VW	8043VW	8044VW
8 cylinder engines	45°	90°	808215	808315	808415

## 8MM MAGX2 SPARK PLUG WIRE SPOOL

Now our 8MM wire featuring the "PerTronix Flame-Thrower MAGx2" Script is available by the spool. Each spool has 100 feet of wire, enough for four to five V8 engines.

**NEW**

Description	Part No.
100' Spool 8mm MAGx2 Spark Plug Wire Black	80S210

80S210

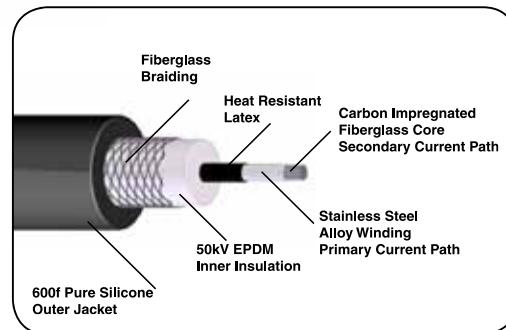

### 7MM "STOCK-LOOK" SPARK PLUG WIRES

Now you can get a "stock-look" spark plug wire, that performs! We've designed our 7mm wires with the same core we use in our 8mm wire. The only difference is the 7mm flat black silicone jacket that hides its performance potential from the naked eye. Get the best of both worlds with "state-of-the-art performance and a stock look." These wires will fit most original wire looms. Select a custom tailored set for a great out of the box fit or a universal kit to match your unique engine and wire loom configuration.

### FEATURES

- Two current paths for reliability and redundancy.
  - Primary path: Spiral wound stainless steel alloy.
  - Secondary path: Carbon impregnated fiberglass center core.
- Low 500 ohm per foot resistance.
- 7mm Silicone jacket to resist high temperatures, moisture, oil and chemicals.
- EPDM (Ethylene Propylene Diene Methylene) inner insulation for superior heat resistance and prevention of arcing and voltage leaks.
- Fiberglass reinforcing braid for added strength and flexibility.
- Lifetime Warranty.

### 7MM "STOCK-LOOK" UNIVERSAL SPARK PLUG WIRES

Universal 7mm spark plug wire kits have the same great features our pre-made kits have and are available with either 90° or straight spark plug boots. Each universal set includes terminals for both male and female terminal distributor caps. These kits come with extra long wires to accommodate most application.

Description	Plug Boot	Dist Boot	Part No.
Universal 8 cylinder	Straight	90°	708180
Universal 8 cylinder	90°	90°	708190

### 7MM "STOCK-LOOK" SPARK PLUG WIRE BY THE SPOOL

We've designed our 7mm wire with the same core we use in our 8mm wire. The only difference is the 7mm flat black silicone jacket which hides its performance potential from the naked eye. Get the best of both worlds with "state-of-the-art performance and a stock look." Each spool has 100 feet of wire, enough for four to five V8 engines.

Description	Part No.
100' Spool 7mm "Stock-Look" Spark Plug Wire	70S210

## INDUSTRIAL DISTRIBUTORS

### INDUSTRIAL DISTRIBUTORS

PerTronix is the leading producer of electronic distributors for gas, propane and LP powered industrial engines. Many Wisconsin and Continental engines are equipped with our industrial distributors from the factory. Proven performance, reduced maintenance downtime, improved economy, faster starts and extended tune-up intervals. Our industrial distributors are also direct replacements for many point type Delco, and Prestolite distributors.

#### FEATURES

- Durable yet lightweight housing.
- Integrated Ignitor Electronic technology.
- Superior venting system.
- 'O' ring seal prevents oil leakage.
- Precision engineered module switches 2 times more energy than other electronic ignition system.
- Timing remains constant with an amazing 1/4° accuracy all the way down to zero RPM.
- Effective RPM range of 0 to 6000.
- Non-tracking cap and rotor.
- Warranty: 30 months Ignitor module / 90 days mechanical.

**SERVICE PARTS**

Keep that engine in your hard working equipment running strong by using high quality service parts from PerTronix. We have a complete selection of service parts to fit our industrial distributors. These parts can also be used to service many original equipment distributors found in Wisconsin and Continental engines.
